Africonsult Architects Engineers Ltd “AAE” is a collaborative organization that represent the entire spectrum of professional skills and experience related to the built environment.

Formed in 1982, AAE represents an assembly of professionals who have been involved with major projects on the international scene for over 30 years. Members of AAE’s multidisciplinary excelled in their work and are highly recognized in their separate professional areas of expertise.

Africonsult Architects Engineers Ltd “AAE” was created to answer the needs of international clients that demand the highest levels of skills and experience that is available and provide the complete range of capabilities to plan, program, design and implement successful projects.

In an era of scarce resources there is now more uncertainty that ever before in the development of large-scale projects. Only with careful planning, efficient design and highly skilled construction & project management can the uncertainties be kept to a minimum. AAE is dedicated to seeing that client objectives are fully met without compromise.

There is a complete awareness of the proper considerations for cultural values and the social impacts of developments as the result of the international experience of the AAE team. AAE also places high priority on the sensitivity of design to climate, natural environment and political structure.

A peruse of this brochure will provide to the reviewer a look at the impressive products of AAE’s professional development team. In addition, a very detailed listing of clients and projects is available on demand in our design office.
